Subject: Window Installation

Hello Tony,

I hope this finds you well. I wanted to let you know that my windows were installed yesterday by Rich and Rubin. They did a phenomenal job putting my windows in. They are truly professionals and paid attention to every detail. They were very conscious to my needs and cleaned up everything. After they left I stood in my living room and noticed the dead silence, no street noise or other outside noise pollution. Even my stereo sounds better. The windows truly are everything you said they would be, the quality and ease of operation. It felt like I had moved into a new house! I really appreciate the effort that you made as well in being honest and showing me what a quality product you have. I will definitely tell people how good the WeatherGard window is and how professional the people are. It's nice to know that a company like yours is right here in our own backyard.

Best regards,

Herb Kaiser
